The European Space Agency wants to build a village on the Moon. The head of the international agency, Johann-Dietrich Woerner, said the village would “serve science, business, and tourism purposes as well as obtaining precious metals and other resources.”

In a video interview posted on the agency’s website, Woerner said a permanent base on the Moon is the next logical step in space exploration. He said the village could replace the International Space Station (ISS) in the future. The ISS has been constantly occupied since 2000. It was originally [26], but its operation has been extended through 2024.

The agency said it could take 20 years before the technology is ready to make the Moon village happen. Woerner said the agency could use the Moon’s natural resources to build the village, instead of [27]. Structures and parts of buildings could be 3D-printed using robots and other machines.

“We [28] at the beginning ... we can start with a small landing mission in order to save money, which many countries are already planning,” he said.

Having a permanent human presence on the Moon could be risky, because of *cosmic radiation, small *meteorites, and extreme temperatures which can range from 253 degrees F (123°C) to minus 243°F (minus 153°C). But Woerner said these risks could be lowered [29]. “If we go into the shadow on the moon, we’d have places where we don’t have the radiation ... at the south pole, which has permanent darkness, where we can find water,” he said.

The Outer Space Treaty, which was signed in 1967, says that [30]. The European Space Agency wants the Moon village to be an international effort that will combine the strengths of different nations which have a

space program.

第5問 次の文章を読み、下の問い（問1～8）に答えなさい。なお、設問の都合上、本文を [A]～[E] の部分に分けてある。（配点 30）

12歳のNatalieは小説家を目指して小説を書いているが、母親が出版社に勤める編集者であることが支障になっている。そこで、親友のZoeに相談すると、ZoeはNatalieに“Theodor Geisel”という名前を告げた。

[A] “*Dr. Seuss.”

Those were Natalie’s first words to Zoe on Friday, whispered during the morning meeting.

When Natalie had discovered that Theodor (Ted) Geisel was the real name of Dr. Seuss, at first she didn’t see Zoe’s point. She thought about it on the bus ride home Thursday, and then off and on all night. By Friday morning Natalie had a pretty good idea why Zoe had made her learn about Ted Geisel.

But as the morning meeting ended and they headed toward the science rooms, Natalie pretended she didn’t have a clue. That way, Zoe could explain everything. Natalie knew that was what Zoe always preferred.

[B] “So, do you get it?” asked Zoe.

Natalie stared at her. “Get what?”

“The idea — you know — Ted Geisel, Dr. Seuss?” prompted Zoe. “You can get your book published by using a different name. That way your mom won’t know it’s you! She reads, she likes, she publishes! Great idea, right? You get to pick a pseudonym, a fake name!”

Natalie paused a few seconds, then said, “You mean I get to lie to my mom, right?”

Zoe made a face. “Oh, come on.”

Zoe and Natalie had different ideas about what was and was not a lie. Natalie always got the best results with the whole truth. Zoe wasn’t a liar,

but as long as the truth was not entirely absent, Zoe felt just fine. They'd had this discussion before, and Natalie usually held out for complete honesty.

[C] But today Zoe was prepared. She said, "Okay, tell me this: Was Dr. Seuss lying to forty billion kids just because they didn't know his real name? Was that a lie? ①"

Natalie started to reply, but Zoe kept on building her case. "② Was Samuel Clemens lying when everybody thought some guy named Mark Twain wrote *Huckleberry Finn*? ③ It's not lying, Natalie. Authors use made-up names all the time. ④"

[D] Natalie said, "Well ... but do you think Ted Geisel lied to his mother? Don't you think *she* knew he was also Dr. Seuss?"

Zoe had to think about that, but only for a few seconds. She said, "Yeah, but ... but I bet his mother wasn't 36. If she was, and if he sent her a bunch of his crazy pictures and stories, she'd probably have said, 'Oh, Ted — this is cute, but it's not really a book. Now, you run along outside and play baseball.' And then millions of kids would never have gotten to read *The Cat in the Hat* or *Green Eggs and Ham* or anything. All because he forgot to use a pseudonym. I bet if his mom had been an editor, he'd have kept his real name a secret — at least for a while. Remember, Natalie, she's not just your mom. She's your *editor*."

[E] Zoe reached behind her chair and pulled the blue folder out of her bag. She handed it to Natalie and said, "Here. I stayed up until eleven last night to read it. It's great, even better than I thought it would be. And I can't wait until it's finished. It's going to make a great book."

Natalie was quiet as she sat down at their worktable in science class. Zoe could feel victory, but she didn't want to rush things. Zoe 37. Natalie always had to think things through for herself. So Zoe pretended to be busy with her science notebook and then started assembling the string

and weights they would need for their experiment about simple machines.

Natalie put the blue folder away. As she slowly pulled her science book from her bag she said, “Cassandra ... Cassandra Day. I’ve always wished my name could be Cassandra. Do you think Cassandra Day is a good name?”

Zoe grinned. “It’s a *great* name!” She stuck out her hand, and when Natalie took it, Zoe pumped it up and down and said, “Cassandra Day, I’m so glad to get to meet such a wonderful author!”
