

HIMEJI DOKKYO UNIVERSITY

Faculty of Pharmaceutical Science Department of Pharmaceutical Health Care

[Purpose](#)

Our purpose is to nurture sophisticated pharmacists with a practical skill, a sense of ethics and humanity, who contribute to support of human health and welfare, having a research mind toward advance of therapeutics.

[The six-year course of Pharmacy](#)

The pharmaceutical students receive training for becoming pharmacists who work in clinical practice or contribute to the public health.

★ 「In Japan, the undergraduate pharmacist programs were changed from a four-year system to a six-year system in April 2006. Students are now required to receive 6 years' study course before taking the National Examination for Pharmacists.」

[The course after graduation](#)

Most graduates work as pharmacists in clinics or pharmacies, and many other professional fields are opened such as various specialists in pharmaceutical companies or admission to the PhD course.
